35kv Electrical insulating Gloves

35KV insulated gloves, imported rubber material, to provide users with excellent insulation properties.

All the gloves meet or exceed the Standard GB/T17622-2008, Q / 12HG5916-2011 and IEC60903-2002.

This glove is particularly suitable for power and communications inspection staff, electrical contractors, plant and facility maintenance technicians, automobile manufacturing / service personnel, machine operators and high-voltage electrical field service technicians.

1. Materials: Imported Natural rubber
2. Test voltage: AC 35kV
3. High-voltage protection: highest voltage AC 30kV
4. Enhanced durability, comfort and mechanical strength
5. Smooth surface finish
7. Color: Yellow
